

Project Development Phase

EduGenie – AI-Powered Learning Assistant

Coding & Solution

Project Modules

File / Component	Description
main.py	FastAPI app, templates, routes and health check.
gemini_client.py	Central Gemini API connection and response handling.
learning_path.py	Builds the structured learning-path prompt.

Feature Routes

Route	Feature
/qa	Question & Answer
/explain	Concept Explanation
/quiz	Quiz Generator
/summarize	Text Summarizer
/learn/recommendations	Personalized Learning Path

Code Snapshots

Add code implementation snapshots here.

Code-Layout, Readability and Reusability

Development Approach

Reusable modules and a centralized Gemini connector make the application easier to maintain and extend.

Module Layout

File / Component	Description
main.py	FastAPI app, templates, routes and health check.
gemini_client.py	Central Gemini API connection and response handling.
learning_path.py	Builds the structured learning-path prompt.

No. of Functional Features Included in the Solution

Total functional features: 5

No.	Feature	Route
1	Question & Answer	/qa
2	Concept Explanation	/explain
3	Quiz Generator	/quiz
4	Text Summarizer	/summarize
5	Personalized Learning Path	/learn/recommendations

Project Executable Files

Source files of the application:

File / Component	Description
main.py	FastAPI app, templates, routes and health check.
gemini_client.py	Central Gemini API connection and response handling.
learning_path.py	Builds the structured learning-path prompt.

Source Code

Place the project source code (main.py, gemini_client.py, learning_path.py, templates/, etc.) in this folder.
